

JOIN US IN A DIALOGUE TO IMPROVE HEALTH CARE FOR BLACK WOMEN!

We are holding a virtual focus group with Black women ages 50 and older, with a uterus, who have ever had history of irregular cycles or abnormal bleeding -- including post-menopausal bleeding.

WHY PARTICIPATE

Endometrial (uterine) cancer is the most common gynecologic cancer in the United States - more common than cervical and ovarian cancer.

Black women are almost twice as likely to die from endometrial cancer compared with white women in the U.S. This is partly because Black women are more likely to be diagnosed later. Earlier diagnosis may lead to better outcomes!

TO PARTICIPATE YOU MUST BE A:

Black or African-American Woman with one of the following criteria:

Experience with bleeding that is concerning to you, including post-menopausal bleedng*

50 years of age or older, with a uterus

*Concerning bleeding can include heavy periods lasting more than 7 days, irregularly timed cycles, spotting in-between periods, requiring transfusions or medications to manage your menstrual cycle, or post-menopausal bleeding.

HOW DO I PARTICIPATE?

Visit the link below to take a survey to see if you are eligible, and feel free to share!
